EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP00/07679

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The following documents are referred to:

- D1: WO 96 09072 A (PHARMACIA) 28 March 1996 (1996-03-28)
D2: US-A-5 804 568 (J.RUBINFELD) 8 September 1998 (1998-09-08) cited in the application
D3: US-A-5 134 127 (V. STELLA ET AL.) 28 July 1992 (1992-07-28) cited in the application

1.0 Novelty (Article 33(2) PCT)

The subject matter of claims 1 to 22 is rendered novel since none of the prior art documents D1 to D3 disclose compositions comprising estramustine phosphate, a sulfoalkyl ether cyclodextrin and human albumin.

The above analysis applies mutatis mutandis to the subject matter of claims 23 and 24.

2.0 Inventive Step (Article 33(3) PCT)

The subject matter of claims 1 to 24 relate to the provision of parenteral formulations comprising estramustine phosphate with a sulfoalkyl cyclodextrin and human albumin, wherein, the technical problem is the avoidance of ulcerative damage and thrombophlebitis at the site of the injection.

D2 which is considered as the closest prior art and teaches the use of alkylated cyclodextrins to reduce ulceration, resulting from extravasation when injecting cytotoxic compounds, differs from the subject matter of claims 1 to 24 in the type of cyclodextrin employed.

D3 teaches the use of sulfoalkyl ether cyclodextrins in order to inhibit crystal formation in cyclodextrin drug complexes made up of water insoluble drugs, but does not address the technical problem of the application as originally filed. Therefore, the subject matter of claims 1 to 24 is considered as to involving an inventive step.

EXAMINATION REPORT - SEPARATE SHEET**

3.0 Industrial Applicability (Article 33(4) PCT)

For the assessment of the present claims 23 and 24 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

Certain observations on the international application

The units mg/m² in claim 4 and on pages 5 and 8 of the description cause a lack of clarity (Article 6 PCT).
